

# Executive Protection Driver

This course focuses on the fundamental driving skills required to operate vehicles as part of an executive protection detail or in a motorcade in a low threat environment. It is designed from the ground up to develop the participant's skills in the operation of motor vehicles through the proper use of vehicle controls.

Participants will then develop skills in evasive driving and response to attacks on motor vehicles. Final training exercises include scenario

based training requiring participants to analyze potential attack scenarios, develop proper responses, and to execute their responses on track, behind the wheel, and in supporting roles. Live munitions, paint ball markers, and actual vehicles will be used at real world speeds.

**Class Size:** 8-24  
**Restrictions:** LE, Military, and Select Security Professionals  
**Duration:** 3 days  
**Location:** OSTC facility  
 West Memphis, AR  
**Cost:** \$2750.00
